#### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 03/03518

<b>V</b> .	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	Statement			<del></del>
	Novelty (N)	Claims		YES
		Claims	1-5	_ NO
	Inventive step (IS)	Claims		YES
		Claims	1-5	NO
	Industrial applicability (IA)	Claims	1~5	_ YES
		Claims		NO

#### 2. Citations and explanations

1. The following documents are cited in the present report. The same numbering will be used throughout the procedure:

D1 DE-A-100 23 441

D2 DE-A-100 63 422.

The following documents are specified in the present report for the first time:

D3 EP-A-0 571 882

D4 EP-A-0 890 619.

- 2. Claims 1-5 do not appear to be novel within the meaning of PCT Article 33(2):
- 2.1 The claimed use of waxes produced using a metallocene catalyst in powder paints is known from D2 (page 7, line 64 to page 9, line 35). The claimed properties [dropping point 80 to 165 °C, density 0.87 to 1.03 g/cm³, viscosity 10 to 100 000 mPa.s (see the example of D2) and particle size (for example in D2, page 3, lines 10 to 15 and page 2, lines 10 to 14)] and the additives are also mentioned in D2.

International application No. PCT/EP 03/03518

It is generally known that metallocene waxes have a narrow molecular weight distribution. For example, D2 refers, in connection with the production of the waxes used therein, to D3, where a preferred molecular weight distribution of those waxes of 2 to 4 is mentioned on page 10. The waxes in D4 also have molecular weight distributions of less than 3 (see table 1).

A person skilled in the art can therefore take the teaching of the current claims directly from D2. The current claims 1-5 are therefore not novel in relation to D2.

- 3. Similarly D1 describes (paragraphs [0035] to [0038]) the use of such waxes in paints. The properties are disclosed in paragraph [0012] and here, too, reference is made to D3 in connection with the production (page 3, line 30), from which the molecular weight distribution is also known to a person skilled in the art.
- 3. The current claims 1-5 are not inventive within the meaning of PCT Article 33(3).
- 3.1 Since claims 1-5 are previously described in D1 and D2, they must also be considered to be obvious.
